Work Experience

Securian Canada

January 2026 – April 2026

Actuarial Intern

Toronto, Ontario

- Performed annual assumption sensitivity testing on **AXIS** (mortality, morbidity, financial/non-financial inputs) to quantify reserve, cash-flow, and PV impacts across independent actuarial models, identifying deltas and loss exposures
- Supported **Risk Integrity (RI)** reporting by transforming complex model outputs into stakeholder-ready summaries
- Authored a [Business Case for Confluence](#) adoption, recommending a governed approach to improve knowledge sharing and documentation practices across teams.

Gore Mutual Insurance

May 2025 – August 2025

Data Analyst

Cambridge, Ontario

- Designed and implemented a comprehensive **OBT in SQL** to support migration from **ThoughtSpot** to **Power BI**
- **Reduced reporting costs by \$300,000** and optimized automobile insurance ELT pipeline using Databricks
- Developed and maintained **monitoring dashboards using Power BI** to track key metrics in automobile insurance
- Attained **30% improvement** in loss trend identification through developing and monitoring dashboards with Power BI
- Developed enterprise-wide Power BI dashboards enabling **self-service analytics**

Wonderland Group

September 2024 – December 2024

Data Analyst

Taipei, Taiwan

- Led a team of analysts in data cleaning and developed data centers to improve data accuracy for portfolio nursery product brands including: Joie Baby, Nuna, Tavo, and Graco
- Improved data accuracy and accessibility by **35%** and utilized **PowerBI** to create [Business Performance Dashboards](#)
- Reduced query processing time by **20% across 10+ reports** by designing and implementing an **SQL** view table with custom grouping to streamline data management and enable efficient reporting for stakeholders
- Developed multiple PowerBI dashboards and reports tailored to different organizational levels, including brand teams, general managers, sales teams, and the CEO, facilitating data-driven decision-making across departments

Side Project: Translation Automation Tool 🐙

- Developed a website tool to automate the translation process for Magento e-commerce stores, increasing efficiency by over 90% and enabling seamless localization for websites in different regions.
- Integrated Google Translate API to automate the creation and processing of translation folders, supporting multiple languages simultaneously and minimizing manual effort

Projects

Personal Portfolio Website | HTML, CSS, JavaScript, Bootstrap 🐙

June 2024

- Created a portfolio website using **HTML5**, **CSS**, and **JavaScript** that incorporates responsive web design principles

3D Interactive Portfolio | Three.js 🐙

October 2024

- Implemented a 3D interactive portfolio using Three.js, showcasing dynamic user interactions to enhance user experience

Leadership & Extracurricular Activities

University of Waterloo Taiwanese Student Society

Spring 2024 – Spring 2025

President

Waterloo, ON

- Coordinated regular meetings and actively collaborated with various clubs to enhance event impact and outreach
- Facilitated interactive workshops and seminars and led successful fundraising initiatives to support organizational goals
